STANFORD MEAN SOLAR MAGNETIC FIELD

Mean Solar Magnetic Field Polarity:

□ = field > 2 microT; ■ = -2 microT ≤ field ≤ 2 microT

■ = field < -2 microT; No box = no data available

* 2000 UT. Rotation numbers given are the Bartels series, but the dates are not; these dates are five days earlier than the corresponding rotation center. The rotation numbers correspond to the centers of the sunspot groups on the Sun that affect the Earth during the given Bartels Rotation.
